

Here we cite the work of Kennedy & Gruber¹ .

In this template we have redefined the command so that the number of the citation coincides with that in the bibliography.

Notice that citations in the body, have priority to those on the header.

¹Christopher A Kennedy and Andrea Gruber. *Journal of Computational Physics*. 2008. 227-3, pp. 1676–1700

²F Ducros et al. *Journal of Computational Physics*. 2000. 161-1, pp. 114–139

Citing the same work twice in a single frame⁹⁹

We are using the method of Jiang & Shu³.

This figure is taken from Jiang & Shu³.

Notice, that this results in a duplicated footnote.

³Guang-Shan Jiang and Chi-Wang Shu. *Journal of computational physics*. 1996. 126-1, pp. 202–228

³Guang-Shan Jiang and Chi-Wang Shu. *Journal of computational physics*. 1996. 126-1, pp. 202–228

⁹⁹this is a footnote

Citing the same work twice in a single frame¹⁰⁰

We are using the method of Jiang & Shu³.

This figure is taken from Jiang & Shu⁴.

This is how we reference the same footnote more than once and avoid duplicates.

³Guang-Shan Jiang and Chi-Wang Shu. *Journal of computational physics*. 1996. 126-1, pp. 202–228

¹⁰⁰To avoid duplicated footnotes, we use the command `footnotemark[number]`.
